PERSONAL PROJECTS

E-Mart (06/2025 - 06/2025)
▫ E-Mart is a modern, responsive e-commerce web application built using React 19. It offers a seamless shopping experience with features like product listing fetched from an external API, detailed product pages, and a fully functional cart system. The checkout process includes a login check, editable shipping address, and pincode-based autofill.

Todo - App (06/2025 - 06/2025)
▫ This is a simple and clean Todo App built with React and Context API. It allows users to add, delete, and mark tasks as complete. The global state is managed using custom context, making it scalable. The UI is minimal and responsive, ideal for productivity-focused task management.Ask ChatGPT

Country Project (04/2025 - 04/2025)
▫ It's a dynamic web application built with HTML, CSS, and React JS that provides detailed information about countries. displaying details such as flags, population, area, region, capital, currencies, languages, timezones, and neighboring countries. React-Router-Dom is used for seamless navigation, This creates an interactive and informative user experience for exploring global data.
